OXE OIL SYSTEM

SPECIFICATIONS AND AREA OF USE

The OXE Oil System range has been carefully tested and selected for commercial use with OXE sub systems from an approved and globally available quality oil supplier and produced according to the high standards of the lubricant industry. OXE Diesel development has been carried out in tandem and attuned to the oil specifications in our OXE branded oil selection, optimizing OXE Diesel performance.

OXE ENGINE OIL

OXE
ENGINE OIL
5 LITRES

A full synthetic oil with unique corrosion inhibitor protects the component from marine environment. Optimum for long service intervals with outstanding lubricity in all climates, protecting turbo and internal engine components.

Available in 5W-30 or 0W-30

OXE BELT TRANSMISSION OIL

OXE BELT
TRANSMISSION OIL
0,5 LITRE

A full synthetic belt transmission oil with exceled lubrication and protection against water ingression and wear under high load.

OXE COOLANT

OXE COOLANT
1 LITRE

OXE premium antifreeze is containing inhibitor for freezing, overheating, rust and corrosion. Protects all cooling system metal surfaces including aluminium. Will not damage rubber or finish.

OXE GEARBOX OIL

OXE GEARBOX OIL
1 LITRE

A fully synthetic oil of highest quality. Specially developed for use with the dual clutch transmission system with continues trolling. Provides excellent protection against excessive wear and extreme high or low temperature. Maintain smooth operation with fantastic stability under all conditions.

OXE PTT OIL

OXE PTT OIL
0,5 LITRE

OXE PTT oil is a non-foaming, heat and pressure resistant oil with premium quality. It allows for smooth operation with reduced wear and meets all OXE Diesel factory requirement.
